COFFING[®] HOISTS

Crane & Hoist Inspection Training

A COMPREHENSIVE, IN-DEPTH TRAINING PROGRAM PROVIDED BY
THE MATERIAL HANDLING PROFESSIONALS AT COFFING HOISTS

This 3-day seminar is the most comprehensive crane and hoist inspection training available anywhere and is applicable to all cranes and hoists regardless of manufacturer.

Top Running and Underhung Cranes, Monorails, Electric, Pneumatic, Hand Chain and Lever Hoists along with Below the Hook Lifting Devices are discussed in every detail. Students will gain competence in evaluating deficiencies and spotting safety related items while learning to interpret Federal Regulations, National Standards and Crane and Hoist Specifications. Participants will receive a 280 page workbook with photos, charts and references to relevant standards for every inspection item discussed. All attendees will receive a Course Completion Certificate.

Certification is optional and requires passing a fifty question multiple choice examination. Those successfully completing the exam will receive a laminated "Crane Inspection Certification Card".

Course Outline

■ Crane and Hoist Configurations & Applicable Standard

■ Inspection Classifications & Record Keeping Requirements

- Every lift, daily, frequent and periodic

■ Load Testing
